**CONTRACT NO. 4400006596
RETAINER CONTRACT FOR BRIDGE DESIGN
FOR REPAIR/REPLACEMENT PLANS
STATEWIDE**

Questions & Answers:

Q1. Is the Prime Consultant required to have a minimum of five years of experience in both fixed and movable bridge design? If the Prime consultant has five years of experience in fixed bridges, can a sub-consultant with movable bridge experience be utilized to satisfy the requirements for movable bridge design experience?

A1. Sub consultants are not desired on this contract because of the nature of the work. The prime consultant should have a bridge design engineer with at least five years of experience in the structural design of bridges. It should not make a difference if the bridge is fixed or movable. The only components that will require repair plans under this contract will be structural.
